Honorable Rex Richardson
Mayor
City of Long Beach
411 West Ocean Boulevard
Long Beach, California 90802

**Re: South Coast Air Quality Management District (SCAQMD)'s Proposed Indirect Source Rule (ISR)-
OPPOSE**

Dear Mayors Bass and Richardson:

The undersigned organizations, representing industry and labor sectors involved in all aspects of goods movement, request your immediate attention to the potential implementation of an Indirect Source Rule (ISR) by the South Coast Air Quality Management District (SCAQMD) that will limit the import and export of goods from the Ports of Los Angeles and Long Beach. We strongly believe that the ISR, if approved, will have a devastating impact on:

- California jobs,
- the national supply chain,
- the state and local economy,
- the ability of the state to transition to zero emission infrastructure and equipment, and
- the competitiveness of the Ports of Los Angeles and Long Beach (Ports),
- the economic vitality of Port-adjacent communities.

The initial SCAQMD staff proposal essentially establishes volume caps on port activities, which will restrict the delivery of critical imported goods including essential construction, manufacturing, and automobile components, as well as medical supplies and halt the export of California's manufactured goods and agricultural products to foreign markets.

The proposed rule will damage the success created by the partnership between the cities of Los Angeles and Long Beach through their respective Harbor Departments, and the maritime labor and goods movement industry. That partnership has successfully competed for hundreds of millions of dollars in State and Federal incentive funding and reduced toxic-related emissions by 85%. Future funding and the basis of that partnership is jeopardized by this proposed ISR.

The proposed ISR would also impact port jobs and revenues. The Port of Long Beach alone supports \$11.9 billion in federal, state, and local taxes. The Port of Los Angeles estimates that 1 in 12 jobs in Los Angeles and Long Beach, as well as 1 in 9 jobs in the counties of Los Angeles, Orange, Riverside, San Bernardino and Ventura are connected to the Ports, and as many as three million jobs nationwide. The Ports are among the best sources of high-paying, secure jobs and our local communities, schools, hospitals and small businesses depend on the jobs that our vibrant port complex produces.

In addition, the proposed ISR would be counter-productive to additional zero-emission reduction-efforts and will actually increase greenhouse gas (GHG) emissions by forcing the diversion of cargo to other, less environmentally conscious, North American trade gateways. The ISR would also inhibit the ability of the local supply chain to finance the equipment and infrastructure upgrades necessary to transition to zero-emission infrastructure, defeating the purpose of California's zero-emission strategies and the Ports' Clean Air Action Plan (CAAP).

Furthermore, many of the gateways referred to above are located in states that directly compete with California economically, but do not share California's goals. The shifting of supply chains and the economic vitality that follows, from San Pedro Bay to other gateways will undoubtedly have numerous unintended consequences.

We urge the cities of Los Angeles and Long Beach to carefully analyze and oppose SCAQMD's proposed ISR and provide federal, state, and local elected officials with critical information about the operation and widespread negative impacts of the proposed ISR.

Sincerely,
